

STRUT SPRING COMPRESSOR

Technical Specification

Model No	: THST100M
Spring Size	: $\phi 80-200$ mm
Spring Rating Max	: 1250 Kg
Maximum Working Length	: 550 mm
Maximum Jacking Height	: 340 mm
Operating Voltage	: 240 V AC

- ◆ The THUNDER Coil Spring Compressor is used to safely compress the **coil spring** on most cars and SUV.
- ◆ This equipment works on a 240v AC power .
- ◆ The Equipment can move on castors and hence it could be placed very close to the vehicle on which the suspension repair is carried out.
- ◆ The machine is fitted with a safety guard to protect
- ◆ The Machine can be separated from the moving column in order to fix the machine on a work bench.
- ◆ The Universal adapters provide the possibility to accommodate different models of spring designs.
- ◆ The spring compression time is less than 10 seconds and it is supposed to be the fastest and best equipment in the world at a very affordable price.
